RADIO CONTROL KITS \* WOOD KITS \* DECOR \* LASER CUTTING SERVICES

07/2021

## Press Release

### Bat from Old School Model Works

We're introducing the latest in our line of kits that you can not only build and fly successfully, but personalize them to your own taste. We're continuing to bring back great designs from the past and rework them to incorporate modern, laser-cut techniques to make kit building better than ever. All of our kits are designed, cut and packaged in our facility right here in the USA. The included premium hardware package is also sourced from brand-name, USA manufacturers to guarantee the best quality.

Our Bat is simplicity and excitement all at the same time. It is based off a 1970's World Engines kit and is a lot of fun to fly alone. But it's tons of fun to fly in groups.

Thanks to precision laser-cutting, and the low parts count, this allows you to completely assemble the airframe in just a few hours.

Between the twin fins, there is an expansive internal area to allow in the installation of a variety of radio gear, as well as batteries (or fuel tank). This is all accessible via three hatches - the two servo hatches and a center hatch with a quick-release latch setup.

Parts are included to build the Bat with either an electric or glow powerplant.

#### Specifications:

Wingspan: 37.25 inches

Wing Area: 360 sq. inches

Length (airframe only): 53 inches (glow), (electric)

Weight: 22-28 ounces RTF

Radio: 3 channel (elevon mixing)

#### Power:

- Glow (.09-.15 engine, 2 ounce tank)

- Electric (250+ watt brushless motor, 3S LiPo)

Retail Price - \$65.95

#### Available from:
