RADIO CONTROL KITS \* WOOD KITS \* DECOR \* LASER CUTTING SERVICES

03/2022

## Press Release

### Sunday Fighter (One-O Nine) from Old School Model Works

Fast, but not too fast. Manueverable, agile and responsive - but not tricky. A snap to build - and with a fully sheeted airframe, surprisingly rugged compared to most.

You should see them take evasive maneuvers in Dog Fighting. Evade with snap rolls into spins, Immelmann turns and a loop.

Because of the interlocking design and high quality laser cutting of the parts, the Sunday Fighter is a quick build. Not only does it build quick, but it also builds straight and true as all of the parts are designed to align properly with a minimum of fuss and alignment tools.

The wing is removable for storage/transport and for giving access to the radio/servo area. From there you have easy access to install most any brand of radio and control linkages. What's more, the fully assembled model can fit in the trunk of most cars.

When assembled, you now have a blank canvas and can apply any number of color schemes, or make up your own.

Don't let the lack of landing gear scare you. Hand launching is easy because of the fuselage's light weight and strengthened design. In the air, it really looks the part without any exposed gear to detract from it's clean lines. Bringing the One-O-Nine in for a belly landing on grass is just as easy.

Although mainly designed for electric power, you can also use a .25-sized glow engine as well. Glow engines are side mounted. Electric motors are mounted on the "extended" firewall to space the motor the proper distance forward.

In the air, the One-O Nine is a blast to fly. A simple hand-launch get's it airborne, then you can cruise quite easily and 1/2 power. Throttle up for loops, eights, snaps, spins, hammerhead turnaounds - or maybe a screaming low-level pass, right down the runway. When you're ready to land, simply throttle back and gently bring the One-O Nine in for a belly landing on the grass.

Our One-O-Nine kit is part of our Sunday Fighter lineup and just might be the most fun you've had in a long time.

#### Specifications:

Wingspan: 44.5 inches

Wing Area: 330 sq. inches

Length (airframe only): 39 inches

Weight: 2.75-3.25 lbs. (rtf)

Radio: 4 channel

Engine: Glow - .25 glow engine

Electric - 350+ watt, 60amp ESC, 3s 2200mAh LiPo
